

Kidney and Urinary Tract Health

CRANBERRY FRUIT COMPLEX

Supplement Facts:

- Vaccinium macrocarpon (Large Cranberry) Mash Extract

Background:

Cranberries have been known for decades to promote a healthy urinary tract in both men and women and are also known as 'super food'. They contain a plethora of unique antioxidants known as proanthocyanidins. These proanthocyanidins can reduce oxidative stress and inflammation in both the urinary tract and kidneys. **Cranberry Fruit Complex** by **Forze Della Natura™** contains a unique natural blend of very potent antioxidants found only in the mash of Large Cranberries that possess properties targeting the sources of inflammation and discomfort in both the urinary and kidney systems of the human body.

Key Features:

- Promotes urinary and kidney health;
- Alleviates urinary and kidney inflammation;
- Lowers blood pressure and stabilizes cholesterol levels;
- Targets discomfort resulting from chronic urinary disease;
- Stabilizes urinary function and improves quality of life;
- Excellent source of potent antioxidants.
