- Orthosiphon stamineus Extract containing Polyphenols;
- Astragalus membranaceus root extract;
- Gynostemma pentaphyllum extract;
- Holy Basil (Ocimum sanctum) extract.

Background:

The kidneys are bean-shaped organs that serve several essential regulatory roles in humans. They remove excess organic molecules from blood and other waste products of metabolism. Kidney health is a key to leading a healthy and active life. Renal discomfort, kidney diseases are all risk factors that all of us encounter during our lifetimes. Individuals over 35 are especially prone to development of kidney stone formations and associated renal discomfort. **Kidney Plus™** by **Forze Della Natura™** is a high-potency and extremely effective nutraceutical blend that helps individuals to successfully cope and overcome set-backs associated with abnormal kidney function. It reduces kidney inflammation, stabilizes waste product removal functions and improves the metabolism of calcites which otherwise contribute to kidney stone formation.

Key Features:

- Supports kidney health;
- Reduces renal and kidney inflammation;
- Stabilizes waste product removal functions;
- Improves kidney metabolism and metabolism of urinary calcites.
