

Cognitive (Brain) Health

COGNITUM

Supplement Facts:

- Siberian Ginseng Root Extract;
- Ginkgo Biloba Leaf Extract;
- Magnesium.

Background:

Memory Loss and Impairment of a Healthy Brain function affects millions of people worldwide. Although some of us think that memory loss occurs only in aging individuals, recent studies have shown that the above group is not the only group of individuals that are prone to this ailment. Our contemporary lifestyles which involve a lot of physical and mental stress impact and undermine our normal brain function which in many cases leads to chronic memory loss issues. Our brain has more than a 100 billion nerve cells where each cell requires specific dietary support for optimum performance. **Cognitum™** by **Forze Della Natura™** contains two very potent memory and nerve cell enhancing compounds, i.e. Siberian Ginseng and Ginkgo Biloba, that significantly increase nerve cell response and enhance both memory and overall brain function.

Key Features:

- Improves and enhances memory function;
- Provides brain nerve cells with nutrients required for optimal performance;
- Supports cognitive health and mental clarity.
