

Forze della Natura™

Male Health

URSOLIC ACID

Supplement Facts:

- Paulownia tomentosa leaf extract – yielding Ursolic acid

Background:

Ursolic Acid is a newly researched pentacyclic triterpenic compound which will revolutionize sports medicine and male nutrition in the coming years. Naturally occurring in a multitude of medicinal herbs and even fruits albeit in meager less-than-needed quantities, it possesses properties that aid the body in lean muscle mass formation, weight-loss, cardio protection and other well-documented benefits. **Ursolic Acid** by **Forze Della Natura™** brings this compound to the forefront in the right daily dosage beneficial in achieving the above goals and more.

Key Features:

- Promotes lean muscle formation;
- Augments muscle strength during resistance training in men;
- Supports Cardiac Health;
- Aids in non-muscle related weight-loss.
